Press release

Roth Composite Machinery exhibits at JEC World in Paris

**Steffenberg/Paris. From 3. March to 5. March 2020
Roth Composite Machinery from Steffenberg,
Germany, will be exhibiting at the JEC World in
Paris. The expert in special-purpose mechanical
engineering exhibits in hall 5 at stand S30. The
company will showcase its machine manufacturer
competences in filament winding, prepreg and
organic sheet production at the international
composites industry trade show.**

Focus of Roth's trade show presentation are machines for manufacturing lightweight materials such as prepregs and towpregs as well as machines for their processing. The performance range comprises high-speed Towpreg Winding, fully automated production lines and the Type 1-ECO Machine for less complex production processes in the field of Filament Winding technology as well as Robot Filament Winding Machines.

The special machine builder from Steffenberg has been developing, planning and manufacturing Filament Winding Machines for more than 55 years and has almost 30 years of experience in the development of fully-automated machines in this sector. Advantages of the production lines are the short installation periods enabling that the production processes can start more quickly. They are working with highest accuracy and efficiency. The handling of all kinds of fibres – from simple glass fibres to sensitive, highly strong fibres for example carbon – also belongs to the know-how of the company. Filament Winding plants for products of all sizes up to those with 120 tons component weight and various parallel working laying units are tested in series production. Beyond that the company has lab machines for Filament Winding and Prepreg at their customers disposal for the design or process development.

About Roth Composite Machinery

Roth Composite Machinery is an expert in the field of special machinery construction – the company develops, designs and builds components, machines as well as complete production lines in the business areas

- Filament Winding & Prepreg
- Pleating & Coating
- Brushes & Brooms

About Roth Industries

Roth Industries GmbH & Co. KG comprising various firms and around 1,300 employees all over the world is one of the most innovative companies in the areas

- Building Solutions - Divisions: Energy Systems, Sanitary Systems, Environmental Systems
- Industrial Solutions – Divisions: Composite Technology, Plastic Technology, Hydraulic Technology

The head office of the medium-sized traditional company is located in Dautphetal, Hesse. While the company's strategic direction, the controlling, auditing as well as the balance and financial planning is effected from there, the local employees are responsible for the development, production and marketing of the products.

28 production and sales companies of Roth Industries are acting all over the world - in core segments as world market leader.

Roth Industries bundles all activities of the companies belonging to the group in Germany and abroad. The company is owned by the Roth family to 100 %.

Competence in

 **energy**  **water**  **plastics**
